

Global myths and global risks: How can we restore society's trust in health research through epidemiology?

Public symposium organised by KIT Royal Tropical Institute

Venue: KIT Royal Tropical Institute, Amsterdam 18 June 2019 4-6pm

Session	Description	Person
Welcome and intro		KIT Chair
Short video on vaccination crisis	Until minute 3.51 of this video: https://www.youtube.com/watch?v=2h55LrgNVZ4&t=235s	
Panel 1	15 minutes Moderator asks 4 international epi experts from India, Uganda, Tanzania and Peru: how do you reflect on the themes that emerged in this video in light of your professional experience?	Moderator: Stuart Blume (UVA)
Plenary 1	15 minutes Fake news and the reproducibility crisis: how did we get there, what are the consequences and what has been the response so far to address the crisis	Mariska Leeflang (AMC)
Mentimeter session with public	15 minutes Risk or myth? Present 3 examples of associations between risk factor and health outcome that have gained popularity in recent years: ask public to vote on whether they think this is real or not, then present latest evidence supporting/debunking	Masja Straetemans (KIT)
Plenary 2	15 minutes Decreasing trends in immunisation in the Netherlands and Europe – drivers and consequences	Nicoline van der Maas (RIVM)
Panel 2	15 minutes Chairs asks all panellists: how should epidemiologists respond to the reproducibility crisis?	Moderator:
Questions from public	5 minutes	Moderator:
